4. CLINICAL PARTICULARS
4.1 Therapeutic indications

HydroCurc® from *Curcuma Longa*. (Turmeric) extract from turmeric, with powerful anti-inflammatory and antioxidant properties that may assist with the relief of joint pain by maintaining healthy joints and connective tissues. Vitamin C and HydroCurc® has natural antioxidant properties that further assist in neutralising free radicals in the body.

4.2 Posology and method of administration

Adults: Take 1 tablet daily, dissolved in a glass of water, or as recommended by your healthcare practitioner.

4.3 Contraindications:

- Hypersensitivity to any of the active substances or to any of the excipients listed in section 6.1.
- Not recommended during pregnancy and/or lactation.
- Contraindicates its use in patients with obstruction of the bile duct, gallstones or any other biliary diseases.
- Patients with stomach ulcers or excess stomach acid or gastroesophageal reflux disease (GERD).
- Contraindicated in patients with bleeding disorders or iron deficiency.
- Contraindicated in patients with diabetes or hypoglycaemia, or hormone-sensitive conditions.

The use in children and adolescents is not recommended.

4.4 Special warnings and precautions for use

- Turmeric may cause gallbladder contractions, dyspepsia, distension, and gastroesophageal reflux.
- It can have an anticoagulant and antiplatelet effect, a hypoglycaemic effect, mild estrogenic effects and may stimulate menstrual flow and the uterus.

4.5 Interaction with other medicines and other forms of interaction

- No side effects have become known with the simultaneous ingestion of Curcumin with food and drink.
- Turmeric may cause gallbladder contractions and should be administered with care to patients with gallstones or gallbladder disease.
- It may also have an anticoagulant and antiplatelet effect and might cause an increased risk of bleeding. Therefore, BIOGEN CURCUMIN FIZZY should be administered with care to patients with bleeding disorders. Discontinue use of BIOGEN CURCUMIN FIZZY at least two weeks before surgery and do not use it perioperatively.
- BIOGEN CURCUMIN FIZZY should not be used with other treatments or herbs that might have an anticoagulant and antiplatelet effect as this might increase the risk of bleeding. Such treatments and herbs include aspirin, fluidione, clopidogrel, dalteparin, enoxaparin, heparin, ticlopidine, warfarin, angelica, clove, danshen, garlic, ginger, ginkgo, Panax ginseng, red clover, willow and others.
- Turmeric can reduce levels of blood glucose and glycosylated haemoglobin (HbA1C) in diabetics and might contribute to hypoglycaemia. BIOGEN CURCUMIN FIZZY should not be taken with other treatments or herbs that have a hypoglycaemic effect such as glimepiride, glyburide, insulin, pioglitazone, rosiglitazone, chlorpropamide, glipizide, tolbutamide, devil's claw, fenugreek, garlic, guar gum, horse chestnut, Panax ginseng, psyllium and Siberian ginseng.
- Research has shown that high levels of turmeric may bind with iron and prevent iron adsorption. Use BIOGEN CURCUMIN FIZZY with caution in patients with iron deficiency.
- Turmeric should be administered with care to patients with gastroesophageal reflux disease as it may cause adverse gastrointestinal effects including dyspepsia, distension and gastroesophageal reflux.
- Administer BIOGEN CURCUMIN FIZZY with caution to women with hormone-sensitive conditions.

4.6 Fertility, pregnancy and lactation

Not recommended for use in pregnancy and lactation.
 Consult a healthcare professional for further information.
 Turmeric may have mild estrogenic effects and may stimulate menstrual flow and the uterus.
